

Mittelschaumrohr M8 Storz 65

Art.-Nr. 60490999

Medium foam nozzles are used to apply extinguishing foam, especially in the form of medium expansion foam. The water/foaming agent mixture is foamed by absorbing air and is applied in a free jet. A high foaming rate is made possible by the integrated refining screen. Equipped with the ball valve, the nozzle guide is able to interrupt the discharge of extinguishing agent.

Technical Data

max. permissible operating pressure [bar]:	16
Material Adapter:	Aluminium
Flow rate at reference pressure p1:	800
Inlet:	Storz 65
Shut-Off-Valve:	Yes
Reference pressure p1 [bar]:	5
Applicable Standard:	EN 16712-3
