Mittelschaumrohr M2 G2" AG

Art.-Nr. 10057899

Medium foam nozzles are used to apply extinguishing foam, especially in the form of medium expansion foam. The water/foaming agent mixture is foamed by absorbing air and is applied in a free jet. A high foaming rate is made possible by the integrated refining screen. Equipped with the ball valve, the nozzle guide is able to interrupt the discharge of extinguishing agent.
