

## Mittelschaumrohr M4 G2" AG

---

Art.-Nr. 60351799

Medium foam nozzles are used to apply extinguishing foam, especially in the form of medium expansion foam. The water/foaming agent mixture is foamed by absorbing air and is applied in a free jet. A high foaming rate is made possible by the integrated refining screen. Equipped with the ball valve, the nozzle guide is able to interrupt the discharge of extinguishing agent.

## Technical Data

Weight [kg]:	4.7
Inlet:	BSP G 2" AG
max. permissible operating pressure [bar]:	16
Material Adapter:	Aluminium
Flow rate at reference pressure p1:	400
Shut-Off-Valve:	Yes
Reference pressure p1 [bar]:	5
Applicable Standard:	EN 16712-3
